

## WORKSHEET 4

### MATHS

### CLASS II

#### I . LEARNING PLACE VALUE

Place value – The value of the place of digit of a digit in a numeral .

Here’s an example showing relationship between the place or position and the value of the digit in a number .

Example: let us take the number **354**

| Hundreds [ H ] | Tens [T ] | Ones [ O ] |
|----------------|-----------|------------|
| 3              | 5         | 4          |

In the number 354

3 is in place of hundreds place and its place value is 300

5 is in place of tens and its place value is 50

4 is in place of ones and its place value is 4

#### Exercise

**I. Write how many ones , tens or hundreds are shown by underlined digits :**

543 – five hundreds

753 – Three ones
